EXPERIENCE

Full Stack Developer

Feb. 2023 – Mar. 2025

Turbu (Remote)

- Led development of the full web application with fully responsive UI using TypeScript, Next.js, and Tailwind CSS.
- Designed scalable database schema and infrastructure using PostgreSQL, Prisma, and AWS.
- Built a real-time chat and notification system using AWS API Gateway, Lambda, and DynamoDB.
- Optimized infrastructure and reduced AWS costs by 60% while maintaining performance during peak loads.
- Implemented secure OAuth authentication using NextAuth (Auth.js) with JWTs for 25,000+ users.
- Integrated Stripe for payment method management and pre-authorized bidding holds.

Jr. Software Engineer

May 2022 – Jan. 2023

Freelance (Remote)

- Built frontend components using React.js, JavaScript, HTML, CSS, and Tailwind.
- Designed and contributed to PostgreSQL schemas based on feature requirements.
- Implemented AWS services including RDS, S3, EC2, and Lambda for scalable infrastructure.
- Collaborated with a team to evaluate and implement client-based system solutions.

Software Consultant

Oct. 2018 – May 2022

Freelance (Remote)

- Delivered 10+ custom websites and e-commerce platforms for local businesses.
- Improved client satisfaction by 25% by delivering projects on time and within budget.
- Provided hosting and technical support for small business websites.

Cloud Support Specialist

Oct. 2017 – Oct. 2020

OVHCloud

Montreal, QC / Remote

- Provided support for public cloud, dedicated servers, and VPS services.
- Investigated recurring incidents, assessed operational risks, and ensured SLA compliance.
- Created documentation for troubleshooting network configs and Anti-DDoS profiles.
- Collaborated with datacenter teams to coordinate service interventions for clients.

EDUCATION

Lighthouse Labs

Montreal, QC

Full stack Web Development Immersive 3-month Program

May 2022

ACHIEVEMENTS

Top 10% of applications – Y Combinator Summer 24
